About Us

BPI Nitrogen Chemical BV is a Dutch-based petrochemical company committed to delivering advanced chemical solutions for industrial cleaning, rust removal, and pipe maintenance. We serve diverse sectors including oil & gas, maritime, manufacturing, and energy.

Mission & Vision

Mission:

To deliver safe, reliable, and environmentally responsible chemical solutions that help industries maintain peak operational efficiency.

Vision:

To be a global leader in nitrogen-based petrochemical products, recognized for innovation, integrity, and industrial excellence.

Core Values

- Innovation
- Quality
- Safety
- Environmental Responsibility
- Customer Satisfaction

Our Products

- Rust Removal Agents
- Descaling Chemicals
- Degreasers
- Nitrogen-based Cleaners
- Custom Formulas

[Our Products Image Placeholder]

Applications

Our products are used in petrochemical pipelines, refineries, factories, ship engines and hulls, power stations, and water treatment systems.

Technology & Innovation

We invest in continuous R&D to ensure our products remain compliant with global standards, safer and easier to use, and environmentally optimized.

Environmental Responsibility

We formulate low-toxicity, biodegradable products with minimal environmental impact and clear disposal instructions.

Health & Safety

All products include Safety Data Sheets (SDS), usage instructions, and comply with REACH, OSHA, and EU standards.

Clientele & Projects

Clients include energy companies, construction firms, marine contractors, and industrial cleaning services. Case studies available on request.

[Clientele & Projects Image Placeholder]

Quality Assurance

All products are batch-tested and follow ISO-compliant manufacturing processes with technical documentation provided.

Why Choose Us

- Custom Solutions
- Fast Delivery
- Competitive Pricing
- Expert Advice
- Proven Reliability

Our Team

Our skilled professionals include engineers, safety officers, analysts, and support specialists.
